Summary

Full Stack Developer proficient in the MERN stack (MongoDB, Express.js, React, Node.js) and Next.js with hands-on experience in building scalable web applications. Skilled in designing and developing RESTful APIs, creating responsive user interfaces, and implementing efficient database architectures. Passionate about delivering clean, maintainable code and optimizing application performance.

Experience

CodeClause

May 2025 - Dec 2025

Generative AI Engineer & Full Stack Developer Intern

Remote, India

- **LLM-Based AI Development:** Developed AI-powered chatbot and code-generation systems using Large Language Models (LLMs), improving response automation speed by 60%.
- **OpenAI API Integration:** Integrated OpenAI APIs into full-stack web applications using Python and NLP techniques, automating workflow tasks and reducing manual processing effort by 40%.
- **Full-Stack Application Development:** Built scalable MERN and Spring Boot applications with optimized frontend/backend architecture, reducing API response latency by 35%.
- **REST API & Backend Optimization:** Designed secure RESTful APIs with optimized database queries, improving application performance and reducing data-fetch time by 30%.

Projects

Banking Kiosk System | Java, Java-AWT & Swing, MySQL

- Developed a real-time banking kiosk system using Java Swing and MySQL to manage customer accounts, KYC verification, deposits, withdrawals, and transaction workflows.
- Implemented secure authentication and transaction validation features, improving banking operation efficiency by 45%.
- Designed optimized database workflows supporting real-time account updates and transaction history for 1000+ customer records.
- Reduced manual banking processing time by approximately 50% through workflow automation and efficient UI design.

Medi-Link Emergency Network | Python, Flask, MySQL, Spoonacular API

- Developed a real-time healthcare emergency platform using Flask, MySQL, and Socket.IO for hospital bed tracking and ambulance management.
- Implemented live synchronization features reducing emergency response coordination delays by 35%.
- Designed scalable backend architecture supporting simultaneous hospital data updates and real-time notifications.
- Integrated emergency booking workflows improving patient allocation efficiency across multiple hospitals.

Result-Flow Portal | Python, Flask, js, Tailwind CSS

- Developed a secure online examination result publishing portal using Flask, JavaScript, and Tailwind CSS.
- Optimized academic database workflows enabling fast result retrieval with response times under 2 seconds.
- Integrated the platform with the existing college management system without modifying legacy infrastructure.
- Successfully deployed and used within the college environment for secure result publishing and student access.

Technical Skills

Programming Languages: JavaScript, Python, PHP, Java, SQL

Frontend: React.js, Next.js, HTML/CSS, Redux, Tailwind CSS, Bootstrap CSS

Backend: Node.js, Express.js, RESTful APIs, GraphQL

Databases: MongoDB, MySQL, PostgreSQL

DevOps & Tools: Git/GitHub, Docker, AWS (EC2/S3), VS Code, Postman

Education

Government College Of Engineering

Bachelor of Technology in Computer Engineering, CGPA: 9.68 / 10

Aug 2025 - Jul 2028

Jalgaon, India

GF's Godavari College of Engineering and Polytechnic

Diploma in Computer Engineering- Percentage : 90.74%

Sep 2022 - Jul 2025

Jalgaon, India
